Absorption Spectra

Optical sensitizing of silver halides by dyes. IV. The optical sensitizing properties of fluorescein dyes in relation to their spectral absorption and constitution, S. E. Sheppard, R. H. Lambert, and R. D. Walter—263

Vibrational frequencies of the isotopic water molecules; equilibria with the isotopic hydrogens, W. F. Libby—101

Infra-red of

Cyclohexane, Robert S. Rasmussen—249

Polyatomic molecules. XIX. Acetaldehyde and acetaldehyde-d_4, J. Carrell Morris—230

Polyatomic molecules. XVIII. Trideuteronitromethane, Thomas P. Wilson—361

Polyatomic molecules. XX. Cyclobutane, Thomas P. Wilson—369

Pyridine vapor, John Turkevich and Peter Cooper Stevenson—328

Ultraviolet of

Some organic solutions, J. R. Platt, I. Rusoff, and H. B. Klevens—535

1,3-butadiene, R. S. Rasmussen, D. D. Tunnicliff, and R. Robert Brattain—432(L)

Adsorption (see **Surface Phenomena**)

Apparatus and Methods

Depolarization studies of Raman lines. A simplified method, George Glockler and Harold T. Baker—446

Atomic Beams

Average $H-H_2$ repulsive potential from collision cross section measurements, I. Amdur—157

Low velocity scattering of H^+ and H_3^+ in hydrogen, J. H. Simons, C. M. Fontana, E. E. Muschlitz, Jr., and S. R. Jackson—307

Low velocity scattering of H_2^+ in hydrogen. The determination of neutralization, J. H. Simons, C. M. Fontana, H. T. Francis, and L. G. Unger—312

Scattering of low velocity hydrogen ions in helium, J. H. Simons, E. E. Muschlitz, Jr., and L. G. Unger—322

Scattering of low velocity hydrogen ions in water vapor, J. H. Simons, H. T. Francis, E. E. Muschlitz, Jr., and G. C. Fryburg—316

Bond Strengths (see **Molecular Structure and Constants**)

Catalysis

Photographic development as a catalyzed, heterogeneous reaction, T. H. James—338

Chemical Reactions (see **Kinetics of Reactions**)

Collision Phenomena

Average $H-H_2$ repulsive potential from collision cross section measurements, I. Amdur—157

Inhibitory effect of iodine on the photolysis of gaseous hydrogen iodide, Richard A. Ogg, Jr., and Russell R. Williams, Jr.—214(L)

Low velocity scattering of H^+ and H_3^+ in hydrogen, J. H. Simons, C. M. Fontana, E. E. Muschlitz, Jr., and S. R. Jackson—307

Low velocity scattering of H_2^+ in hydrogen. The determination of neutralization, J. H. Simons, C. M. Fontana, H. T. Francis, and L. G. Unger—312

Quenching of cadmium resonance radiation (3261A) by hydrocarbons and other gases, E. W. R. Steacie and D. J. LeRoy—164

Scattering of low velocity hydrogen ions in helium, J. H. Simons, E. E. Muschlitz, Jr., and L. G. Unger—322

Scattering of low velocity hydrogen ions in water vapor, J. H. Simons, H. T. Francis, E. E. Muschlitz, Jr., and G. C. Fryburg—316

Conductance

Electrical conductivity of lead chromate, Theodore William Lashof—196

Of aqueous solutions of potassium bromide at temperatures from 15° to 45°C, and the limited mobility of bromide ion, H. E. Gunning and A. R. Gordon—18

Transference numbers of potassium bromide in aqueous solution at 25°C, A. G. Keenan and A. R. Gordon—172

Crystal Structure

Diffraction of x-rays by sodium stearate at room temperature, James W. McBain, Alexander de Bretteville, Jr., and Sydney Ross—179

Of gadolinium formate, $Gd(OOCH)_3$, A. Pabst—145

Of silver oxalate, R. L. Griffith—499

On the structure of $Mo(CN)_8^{-4}$, Giulio Racah—214

Photographic latent image. I. Lattice energy and related quantities for a hypothetical silver bromide crystal having the cubic ZnS type of structure, Maurice L. Huggins—412

Photographic latent image. II. Outline of theory, Maurice L. Huggins—419

Crystalline State

Diffraction of x-rays by sodium stearate at room temperature, James W. McBain, Alexander de Bretteville, Jr., and Sydney Ross—179

Electrical conductivity of lead chromate, Theodore William Lashof—196

Frequency spectrum of crystalline solids. II. General theory and applications to simple cubic lattices, Elliott W. Montroll—481

Photographic latent image. I. Lattice energy and related quantities for a hypothetical silver bromide crystal having the cubic ZnS type of structure, Maurice L. Huggins—412

Photographic latent image. II. Outline of theory, Maurice L. Huggins—419

X-ray diffraction investigation of sodium stearate from room temperature to the melting point, A. de Bretteville, Jr., and J. W. McBain—426

Dielectric Constants
Influence of hindered molecular rotation on the dielectric constants of water, alcohols, and other polar liquids, Gerald Oster and John G. Kirkwood—175
Diffusion
Of air through monel metal, H. S. Coleman and H. L. Yeagley—135
Dissociation
Activation energy of the reaction $CH_3+HBr=CH_4+Br$ and the carbon-hydrogen bond strength in methane, Holger C. Andersen and G. B. Kistiakowsky—6

Elasticity
Kintic theory of rubber, F. C. Auluck and D. S. Kothari—387
Mechanical properties of polymeric materials, Arthur Tobolsky and Henry Eyring—125
Statistical lengths of rubber-like hydrocarbon molecules, Frederick T. Wall—67
Statistical mechanics of cross-linked polymer networks. I. Rubberlike elasticity, Paul J. Flory and John Rehner, Jr.—512
Statistical mechanics of cross-linked polymer networks. II. Swelling, Paul J. Flory and John Rehner, Jr.—521
Statistical thermodynamics of rubber. III, Frederick T. Wall—527
Statistical treatment of imperfectly flexible chains, Hubert M. James and Eugene Guth—531(L)
Theory of the elastic properties of rubber, Hubert M. James and Eugene Guth—455
Electrochemistry
Electrical capacity of the double layer, W. G. Eversole and Charles R. Estee—156(L)
Relation between ξ-potential and the electrical capacity of the double layer, W. G. Eversole and Charles R. Estee—63
Electron Affinity
Direct experimental determination of the electron affinity of chlorine, Kenneth James McCallum and Joseph E. Mayer—56
Explosion (see **Ignition**)

Fluorescence
Quantum yield of diacetyl fluorescence, G. H. Almy and P. R. Gillette—188
Quenching of cadmium resonance radiation (3261A) by hydrocarbons and other gases, E. W. R. Steacie and D. J. LeRoy—164
Free Rotation (see **Rotation**)

Heat Capacity (see **Thermodynamic Properties**)
Hindered Rotation (see **Rotation**)

Ignition
Stability and structure of burner flames, Bernard Lewis and Guenther von Elbe—75
Thermal hydrogen-oxygen reaction; measurements in large vessels, O. Oldenberg and J. E. Morris—247(L)

Infra-Red Spectra (see also **Absorption Spectra**)
Equilibrium in hydrogen-water systems containing tritium, James F. Black and Hugh S. Taylor—395
Exchange of radioactive silver and bromide with silver bromide suspensions, A. Langer—11
Investigation of the mechanism of chemical reactions with heavy oxygen, A. E. Brodsky, N. I. Dedussenko, I. A. Makolkin, and G. P. Miklukhin—342(L)
Ratio rule, Hermann D. Noether—97
Use of the exchange between carbon dioxide, carbonic acid, bicarbonate ion, and water for isotopic concentration, Allen F. Reid and Harold C. Urey—403
Vibrational frequencies of the isotopic water molecules; equilibria with the isotopic hydrogens, W. F. Libby—101

Kinetics of Reactions
Activation energy of the reaction $CH_3+HBr=CH_4+Br$ and the carbon-hydrogen bond strength in methane, Holger C. Andersen and G. B. Kistiakowsky—6
Detection of an intermediate step in the autoxidation of hydroquinone. Aerial fogging of photographic emulsions, T. H. James—183
Electrostatic influence of substituents on reaction rates. IV, Donna Price and F. H. Westheimer—150
Exchange of radioactive silver and bromide with silver bromide suspensions, A. Langer—11
Gel formation in vinyl-divinyl copolymers, W. H. Stockmayer and Homer Jacobson—393(L)
Inhibitory effect of iodine on the photolysis of gaseous hydrogen iodide, Richard A. Ogg, Jr., and Russell R. Williams, Jr.—214(L)
Investigation of the mechanism of chemical reactions with heavy oxygen, A. E. Brodsky, N. I. Dedussenko, I. A. Makolkin, and G. P. Miklukhin—342(L)
Kinetics of the oxidation of isopropyl alcohol by chromic acid, F. H. Westheimer and Aaron Novick—506
On the kinetics of copolymerization, Herman Branson and Robert Simha—297
Photographic development as a catalyzed, heterogeneous reaction, T. H. James—338
Photographic latent image. I. Lattice energy and related quantities for a hypothetical silver bromide crystal having the cubic ZnS type of structure, Maurice L. Huggins—412
Photographic latent image. II. Outline of theory, Maurice L. Huggins—419
Quantum yield of diacetyl fluorescence, G. H. Almy and P. R. Gillette—188
Quenching of cadmium resonance radiation (3261A) by hydrocarbons and other gases, E. W. R. Steacie and D. J. LeRoy—164
Some remarks on the kinetics of vinyl derivative polymerization, J. Abere, G. Goldfinger, H. Mark, and H. Naidus—379
Stability and structure of burner flames, Bernard Lewis and Guenther von Elbe—75
Surface recombination of H atoms and OH radicals, W. V. Smith—110

Kinetics of Reactions (*continued*)
Thermal hydrogen-oxygen reaction; measurements in large vessels, O. Oldenberg and J. E. Morris—247(L)
Transmission coefficient in the theory of absolute reaction rates, Hugh M. Hulburt and J. O. Hirschfelder—276
Use of the exchange between carbon dioxide, carbonic acid, bicarbonate ion, and water for isotopic concentration, Allen F. Reid and Harold C. Urey—403

Large Molecules
Gel formation in vinyl-divinyl copolymers, W. H. Stockmayer and Homer Jacobson—393(L)
Kinetic theory of rubber, F. C. Auluck and D. S. Kothari—387
Mechanical properties of polymeric materials, Arthur Tobolsky and Henry Eyring—125
On the kinetics of copolymerization, Herman Branson and Robert Simha—297
Some remarks on the kinetics of vinyl derivative polymerization, J. Abere, G. Goldfinger, H. Mark, and H. Naidus—379
Statistical lengths of rubber-like hydrocarbon molecules, Frederick T. Wall—67
Statistical mechanics of cross-linked polymer networks. I. Rubberlike elasticity, Paul J. Flory and John Rehner, Jr.—512
Statistical mechanics of cross-linked polymer networks. II. Swelling, Paul J. Flory and John Rehner, Jr.—521
Statistical thermodynamics of rubber. III, Frederick T. Wall—527
Statistical treatment of imperfectly flexible chains, Hubert M. James and Eugene Guth—531(L)
Structure of the protein molecule, D. G. Dervichian—236
Theory of dissolution of gels, Arthur Tobolsky—290
Theory of molecular size distribution and gel formation in branched-chain polymers, Walter H. Stockmayer—45
Theory of the elastic properties of rubber, Hubert M. James and Eugene Guth—455

Liquids
Atomic and electronic distributions in liquid nitrogen, nitric oxide, and nitrous oxide, Paul C. Sharrah—435
Electrostatic contribution to hindered rotation in certain ions and dipolar ions in solution. II, Terrell L. Hill—552
Magnetic susceptibilities of metals dissolved in liquid ammonia, Simon Freed and Nathan Sugarman—354
Partition function for liquids from the harmonic oscillator model, F. A. Matsen and George M. Watson—343
Structure of liquid carbon tetrachloride, E. E. Bray and N. S. Gingrich—351
Structure of liquid mercury, J. A. Campbell and J. H. Hildebrand—330
Structure of liquid xenon, J. A. Campbell and J. H. Hildebrand—334
Variation in the structure of water in ionic solutions. II, G. W. Stewart—72
X-ray diffraction investigation of sodium stearate from room temperature to the melting point, A. de Bretteville, Jr., and J. W. McBain—426

Magnetic Properties
Magnetic susceptibilities of metals dissolved in liquid ammonia, Simon Freed and Nathan Sugarman—354
Magnetic susceptibility of oxygen and nitric oxide at low field strengths, A. Burris and C. D. Hause—442

Mechanics, Quantum
Application of group theory to isomerism in general, Terrell L. Hill—294
Application of Polya's theorem to optical, geometrical, and structural isomerism, William J. Taylor—532(L)
Asymmetric rotor. I. Calculation and symmetry classification of energy levels, Gilbert W. King, R. M. Hainer, and Paul C. Cross—27
Electrostatic contribution to hindered rotation in certain ions and dipolar ions in solution. II, Terrell L. Hill—552
Interaction of the van der Waals type between three atoms, B. M. Axilrod and E. Teller—299
Note concerning *l*-type doubling in linear polyatomic molecules, Harald H. Nielsen and Wave H. Shaffer—140
On the structure of $Mo(CN)_8^{-4}$, Giulio Racah—214(L)
Transmission coefficient in the theory of absolute reaction rates, Hugh M. Hulburt and J. O. Hirschfelder—276
Vibration-rotation energies of the linear X-Y-Z type molecule, Alvin H. Nielsen—160

Mechanics, Statistical
Attainment of thermal equilibrium between a gas and a hot surface, Paul M. Doty—557
Distance correlations and Bose-Einstein condensation, F. London—203
Frequency spectrum of crystalline solids. II. General theory and applications to simple cubic lattices, Elliott W. Montroll—481
Gel formation in vinyl-divinyl copolymers, W. H. Stockmayer and Homer Jacobson—393(L)
Influence of hindered molecular rotation on the dielectric constants of water, alcohols, and other polar liquids, Gerald Oster and John G. Kirkwood—175
Kinetic theory of rubber, F. C. Auluck and D. S. Kothari—387
Mechanical properties of polymeric materials, Arthur Tobolsky and Henry Eyring—125
Of binary mixtures, T. Alfrey and H. Mark—496(L)
Of binary mixtures, F. Kottler—153
Of cross-linked polymer networks. I. Rubberlike elasticity, Paul J. Flory and John Rehner, Jr.—512
Of cross-linked polymer networks. II. Swelling, Paul J. Flory and John Rehner, Jr.—521
On the kinetics of copolymerization, Herman Branson and Robert Simha—297

Partition function for liquids from the harmonic oscillator model, F. A. Matsen and George M. Watson—343
Some remarks on the kinetics of vinyl derivative polymerization, J. Abere, G. Goldfinger, H. Mark, and H. Naidus—379
Statistical lengths of rubber-like hydrocarbon molecules, Frederick T. Wall—67
Statistical thermodynamics of rubber. III, Frederick T. Wall—527
Statistical treatment of imperfectly flexible chains, Hubert M. James and Eugene Guth—531(L)
Theory of dissolution of gels, Arthur Tobolsky—290
Theory of molecular size distribution and gel formation in branched-chain polymers, Walter H. Stockmayer—45
Theory of the elastic properties of rubber, Hubert M. James and Eugene Guth—455

Molecular Beams (see **Atomic Beams**)

Molecular Films (see **Surface Phenomena**)

Molecular Spectra (see **Absorption Spectra, Fluorescence**)

Molecular Structure and Constants

Activation energy of the reaction $CH_3+HBr=CH_4+Br$ and the carbon-hydrogen bond strength in methane, Holger C. Andersen and G. B. Kistiakowsky—6
Application of group theory to isomerism in general, Terrell L. Hill—294
Application of Polya's theorem to optical, geometrical, and structural isomerism, William J. Taylor—532(L)
Atomic and electronic distributions in liquid nitrogen, nitric oxide, and nitrous oxide, Paul C. Sharrah—435
Attainment of thermal equilibrium between a gas and a hot surface, Paul M. Doty—557
Average $H-H_2$ repulsive potential from collision cross section measurements, I. Amdur—157
Configuration of 1,3-butadiene, R. S. Rasmussen, D. D. Tunnicliff, and R. Robert Brattain—432(L)
Depolarization studies of Raman lines. A simplified method, George Glockler and Harold T. Baker—446
Determination of chlorine vibrations in dichlorobenzenes from intensities and polarizations of their Raman lines, Gertrud Nordheim and H. Sponer—253
Direct experimental determination of the electron affinity of chlorine, Kenneth James McCallum and Joseph E. Mayer—56
Electrostatic contribution to hindered rotation in certain ions and dipolar ions in solution. I, Terrell L. Hill—545
Extension of the attractive energy of a solid into an adjacent liquid or film and the decrease of energy with distance, William D. Harkins and George Jura—560(L)
Frequency spectrum of crystalline solids. II. General theory and applications to simple cubic lattices, Elliott W. Montroll—481
Influence of hindered molecular rotation on the dielectric constants of water, alcohols, and other polar liquids, Gerald Oster and John G. Kirkwood—175
Infra-red absorption spectrum and configuration of cyclohexane, Robert S. Rasmussen—249
Interaction of the van der Waals type between three atoms, B. M. Axilrod and E. Teller—299
Kinetics of the oxidation of isopropyl alcohol by chromic acid, F. H. Westheimer and Aaron Novick—506
Low velocity scattering of H^+ and H_3^+ in hydrogen, J. H. Simons, C. M. Fontana, E. E. Muschlitz, Jr., and S. R. Jackson—307
Low velocity scattering of H_2^+ in hydrogen. The determination of neutralization, J. H. Simons, C. M. Fontana, H. T. Francis, and L. G. Unger—312
Magnetic susceptibility of oxygen and nitric oxide at low field strengths, A. Burris and C. D. Hause—442
Note concerning *l*-type doubling in linear polyatomic molecules, Harald H. Nielsen and Wave H. Shaffer—140
On the structure of $Mo(CN)_3^{-4}$, Giulio Racah—214(L)
Potential barriers in ethyl alcohol and the equilibrium in the reaction $C_2H_4+H_2O\rightleftarrows C_2H_5OH$, John G. Aston, George J. Szasz, and Saul Isserow—532(L)
Quantum yield of diacetyl fluorescence, G. H. Almy and P. R. Gillette—188
Ratio rule, Hermann D. Noether—97
Scattering of low velocity hydrogen ions in helium, J. H. Simons, E. E. Muschlitz, Jr., and L. G. Unger—322
Scattering of low velocity hydrogen ions in water vapor, J. H. Simons, H. T. Francis, E. E. Muschlitz, Jr., and G. C. Fryburg—316
Steric strains and the anomalous base strengths of the methylamines, Herbert C. Brown and Herman Bartholomay, Jr.—43(L)
Structure of liquid carbon tetrachloride, E. E. Bray and N. S. Gingrich—351
Structure of liquid mercury, J. A. Campbell and J. H. Hildebrand—330
Structure of liquid xenon, J. A. Campbell and J. H. Hildebrand—334
Structure of the protein molecule, D. G. Dervichian—236
Vibration-rotation energies of the linear X-Y-Z type molecule, Alvin H. Nielsen—160
Vibrational frequencies of the isotopic water molecules; equilibria with the isotopic hydrogens, W. F. Libby—101

Phase Transitions

X-ray diffraction investigation of sodium stearate from room temperature to the melting point, A. de Bretteville, Jr., and J. W. McBain—426

Phosphorescence

Of adsorbed trypaflavine and its quenching by oxygen, James Franck and Peter Pringsheim—21

Photochemistry

Activation energy of the reaction $CH_3+HBr=CH_4+Br$ and the carbon-hydrogen bond strength in methane, Holger C. Andersen and G. B. Kistiakowsky—6
Detection of an intermediate step in the autoxidation of hydroquinone. Aerial fogging of photographic emulsions, T. H. James—183

Photochemistry (*continued*)
Inhibitory effect of iodine on the photolysis of gaseous hydrogen iodide, Richard A. Ogg, Jr., and Russell R. Williams, Jr.—214(L)
Optical sensitizing of silver halides by dyes. IV. The optical sensitizing properties of fluorescein dyes in relation to their spectral absorption and constitution, S. E. Sheppard, R. H. Lambert, and R. D. Walker—263
Phosphorescence of adsorbed trypaflavine and its quenching by oxygen, James Franck and Peter Pringsheim—21
Photographic development as a catalyzed, heterogeneous reaction, T. H. James—338
Photographic latent image. I. Lattice energy and related quantities for a hypothetical silver bromide crystal having the cubic ZnS type of structure, Maurice L. Huggins—412
Photographic latent image. II. Outline of theory, Maurice L. Huggins—419

Quantum Mechanics (see **Mechanics, Quantum**)

Raman Spectra
Depolarization studies of Raman lines. A simplified method, George Glockler and Harold T. Baker—446
Determination of chlorine vibrations in dichlorobenzenes from intensities and polarizations of their Raman lines, Gertrud Nordheim and H. Sponer—253
Of acetylenes. VII. Symmetrical-top acetylenes, Forrest F. Cleveland and M. J. Murray—450
Of hydrocarbons. I. 1-octene, *cis*+*trans* 2-octene, *trans*-3-octene, *trans*-4-octene, 4-octyne, and 1-octyne, Forrest F. Cleveland—1
Of hydrocarbons. II. 2-methyl-1-heptene and 6-methyl-1-heptene, Forrest F. Cleveland—227
Of hydrocarbons. III. Diisobutylene, cyclohexene, and dipentene, Forrest F. Cleveland—301
Of polyatomic molecules. XVIII. Trideuteronitromethane, Thomas P. Wilson—361
Of polyatomic molecules. XIX. Acetaldehyde and acetaldehyde-d_4, J. Carrell Morris—230
Of polyatomic molecules. XX. Cyclobutane, Thomas P. Wilson—369
Ratio rule, Hermann D. Noether—97

Rotation
Asymmetric rotor. I. Calculation and symmetry classification of energy levels, Gilbert W. King, R. M. Hainer, and Paul C. Cross—27
Configuration of 1,3-butadiene, R. S. Rasmussen, D. D. Tunnicliff, and R. Robert Brattain—432(L)
Electrostatic contribution to hindered rotation in certain ions and dipolar ions in solution. I, Terrell L. Hill—545
Electrostatic contribution to hindered rotation in certain ions and dipolar ions in solution. II, Terrell L. Hill—552
Influence of hindered molecular rotation on the dielectric constants of water, alcohols, and other polar liquids, Gerald Oster and John G. Kirkwood—175

Rubber (see **Large Molecules** and **Elasticity**)

Solutions (see **Liquids**)

Sound
Specific heat ratios in CO_2, Leon Katz—496(L)
Specific heats of carbon tetrafluoride from supersonic measurements, Walter H. Byers—348

Spectra (see **Absorption Spectra, Fluorescence,** and **Raman Spectra**)

Statistical Mechanics (see **Mechanics, Statistical**)

Surface Phenomena
Absolute method for the determination of the area of a fine crystalline powder, William D. Harkins and George Jura—430(L)
Adsorption method for the determination of the area of a solid without the assumption of a molecular area, and the area occupied by nitrogen molecules on the surfaces of solids, William D. Harkins and George Jura—431(L)
Attainment of thermal equilibrium between a gas and a hot surface, Paul M. Doty—557
Electrical capacity of the double layer, W. G. Eversole and Charles R. Estee—156(L)
Energy relations in film penetration, Jack Schubert and G. E. Boyd—215(L)
Extension of the attractive energy of a solid into an adjacent liquid or film and the decrease of energy with distance, William D. Harkins and George Jura—560(L)
New adsorption isotherm which is valid over a very wide range of pressure, George Jura and William D. Harkins—430(L)
Relation between ξ-potential and the electrical capacity of the double layer, W. G. Eversole and Charles R. Estee—63
Relationship between the energy of adsorption of a vapor on a solid and of immersion of the solid in a liquid, George Jura and William D. Harkins—561(L)
Sorption of NH_3 on montmorillonitic clay, I. Cornet—217
Surface recombination of H atoms and OH radicals, W. V. Smith—110

Thermodynamic Properties
Direct experimental determination of the electron affinity of chlorine, Kenneth James McCallum and Joseph E. Mayer—56
Equilibrium in hydrogen-water systems containing tritium, James F. Black and Hugh S. Taylor—395
Magnetic susceptibilities of metals dissolved in liquid ammonia, Simon Freed and Nathan Sugarman—354
Potential barriers in ethyl alcohol and the equilibrium in the reaction $C_2H_4+H_2O \rightleftarrows C_2H_5OH$, John G. Aston, George J. Szasz, and Saul Isserow—532(L)
Relationship between the energy of adsorption of a vapor on a solid and of immersion of the solid in a liquid, George Jura and William D. Harkins—561(L)
Specific heat of pure iron at low temperature, K. K. Kelly—16
Specific heat ratios in CO_2, Leon Katz—496(L)

Specific heats of carbon tetrafluoride from supersonic measurements, Walter H. Byers—348

Transference Numbers

Transference numbers of potassium bromide in aqueous solution at 25°C, A. G. Keenan and A. R. Gordon—172

Ultrasonics (see **Sound**)

Valence (see **Mechanics, Quantum**)

X-Ray Diffraction

Atomic and electronic distributions in liquid nitrogen, nitric oxide, and nitrous oxide, Paul C. Sharrah—435

Crystal structure of gadolinium formate, $Gd(OOCH)_3$, A. Pabst—145

Crystal structure of silver oxalate, R. L. Griffith—499

Diffraction of x-rays by sodium stearate at room temperature, James W. McBain, Alexander de Bretteville, Jr., and Sydney Ross—179

Structure of liquid carbon tetrachloride, E. E. Bray and N. S. Gingrich—351

Structure of liquid mercury, J. A. Campbell and J. H. Hildebrand—330

Structure of liquid xenon, J. A. Campbell and J. H. Hildebrand—334

Variation in the structure of water in ionic solutions. II, G. W. Stewart—72

X-ray diffraction investigation of sodium stearate from room temperature to the melting point, A. de Bretteville, Jr., and J. W. McBain—426
